**Subject:** DSI 9555 Rev A

Everyone,

The D412-775-015 Fuel Panel Protective Trim Kit has been updated to include a bevel on the top side that better protects the honeycomb core from damage when refueling. An ECN is on its way to Kim in Hawkesbury with the updated drawing, DSI, and MDL. It was assumed that we would scrap kits in stock and stock CHG 002 only. The last thing we need at this point is a customer getting the old kit when he specifically ordered the new kit, which can easily be trimmed into the old kit if that is the customer's preference.

Suggest we make one and try it at Eagle before the first customer tries it.

And again I ask myself ... What would we do without Roberto?

David
